PROJECTS

- Flipkart Clone**
Developed an e-commerce web application using Java, JSP, Servlets, JDBC, MySQL, HTML, CSS, and Bootstrap. Implemented features such as user authentication, product browsing, cart management, wishlist, and order processing. Designed a seller registration module allowing sellers to add, update, and manage products displayed to customers on the platform.
- Student Marks Management System**
Built a student record management system using Java, JSP, Servlets, JDBC, and MySQL following MVC architecture. Implemented CRUD operations and generated downloadable PDF marksheets.
- OTT Platform**
Designed and developed a responsive OTT platform user interface using HTML, CSS, and JavaScript. Currently enhancing the project by integrating React.js for improved interactivity and scalability.
