

SAYED YASIN

Java Full Stack Developer

6303834758 | syedyasin075@gmail.com | Naidupet, Andhra Pradesh, India

[LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

SUMMARY

Java Full Stack Developer with hands-on experience building web applications and backend services using Java, Spring Boot, JSP, Servlets, JDBC, Hibernate/JPA, REST APIs, MySQL, JavaScript, and React.js. Developed authentication, authorization, CRUD workflows, database operations, and RESTful services across academic, internship, and personal projects. Experienced in JWT-based security, API testing with Postman, MVC architecture, debugging, Git, GitHub, and Maven. Currently developing a digital wallet application with secure transaction workflows and a React.js frontend.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering

Sri Venkateswara College of Engineering, Tirupati

2023 – 2027

CGPA: 8.81

- Strong foundation in programming, software development, and database management.
- Focused on Java Full Stack Development, Web Technologies, MVC Architecture, and DSA.

Intermediate (MPC)

TMR Junior College

2021 – 2023

Percentage: 95%

INTERNSHIPS & TRAINING

MERN Stack Development Intern

SmartBridge Internship – Andhra Pradesh State Council of Higher Education (APSCHE)

2 Months | Virtual

- Completed a 2-month virtual internship focused on MERN Stack development and full-stack web application engineering.
- Developed and deployed **1 full-stack Book Store application** supporting book browsing, product management, user interactions, and responsive web workflows.
- Integrated REST APIs across **1 deployed Book Store application** to connect frontend workflows with backend services and support data exchange between application modules.
- Tested application functionality, debugged issues, and deployed the project for live access. [Live Demo](#)

Java Full Stack Development Intern

Phani Soft Tech Solutions (PST)

Feb 2025 – Aug 2025

- Contributed to 3 full-stack web applications covering authentication, database operations, and business workflows.
- Executed 15+ database operations including record creation, retrieval, modification, and deletion across multiple application modules.
- Applied Core Java, OOP, Collections, Exception Handling, and JDBC to develop 20+ backend functionalities supporting authentication and database integration.
- Identified and resolved issues in 20+ application features through testing and debugging.

AWS Cloud Computing Training Participant

Viksha Tech Solutions Private Limited

Aug 2025

- Completed hands-on AWS training covering **4 core areas**: compute, storage, networking, and security, with practical exposure to cloud deployment concepts.
- Worked with **2 AWS services, Amazon EC2 and Amazon S3**, through guided exercises involving application hosting, cloud storage, and resource management.

SKILLS

- Languages:** Java, SQL
- Frontend:** HTML5, CSS3, Tailwind, React.js
- Backend:** Spring Boot, REST APIs, JSP, Servlets, JDBC
- ORM:** Hibernate, Spring Data JPA
- Database:** MySQL
- Security:** Spring Security, JWT, Role-Based Access Control
- Core Java:** OOP, Collections, Exception Handling
- Concepts:** MVC, CRUD, Session Management, RESTful Web Services, Database Connectivity
- Testing:** Postman, REST API Testing, API Validation
- Tools:** Git, GitHub, Maven, Eclipse, VS Code
- Cloud:** AWS Fundamentals
- Problem Solving:** Data Structures & Algorithms

PROJECTS

• Paysphere Digital Wallet System | Currently Developing

Developing a secure digital wallet application that enables users to register, authenticate, manage wallet balances, and transfer money between accounts through REST-based workflows. Enforced JWT-based authentication and role-based access to secure user and administrative operations, with persistent management of users, wallets, and transactions. Engineered transaction workflows to validate requests, update wallet balances, and maintain transaction records while testing backend APIs and authentication flows using Postman. Currently developing the frontend to provide user interfaces for authentication, wallet management, and money transfers.

• CartZone E-Commerce | [Live Demo](#)

Engineered an end-to-end e-commerce platform supporting separate customer and seller workflows. Built user authentication, product browsing, shopping cart, wishlist, and order processing for customers, along with product and order management through seller dashboards. Structured database-driven workflows to maintain product, user, cart, and order information throughout the purchasing process.

• Student Marks Management System | [Live Demo](#)

Created an academic management system for maintaining student academic records through an admin workflow. Managed student registration, record management, marks entry, updating, and deletion while maintaining data consistency across operations. Automated generation of student mark sheets in PDF format and structured the application using MVC to separate presentation, business logic, and data-access responsibilities.
